SUMMARY

Full-stack developer skilled in MERN, Flask, and cloud platforms (AWS, Azure), with experience building AI-driven applications, RAG/LLM workflows, REST APIs, and data pipelines. Experienced in integrating APIs and processing large datasets with BigQuery. Strong foundation in scalable application development, cloud deployment, data processing and modern AI technologies.

EDUCATION

Malviya National Institute of Technology, Jaipur

B.Tech., CGPA: 9.02/10

2021–2025

Aakash Career Institute, Jhunjhunu

RBSE 12th Examination, Secured an aggregate of 99.40%

2021

Shri Gangaram Balkishan Modi Public School, Jhunjhunu

RBSE 10th Examination, Secured an aggregate of 93.67%

2019

WORK EXPERIENCE

Software Developer Intern

Vegavid Technology Private Limited

(May 2024- July 2024)

- **Description:**
- Built a subscription-based **MERN** application with secure **JWT** authentication and **Stripe** payment integration.
- Implemented automated email notifications via **Mailjet** and enhanced UX with React Toastify.
- Designed test cases and generated coverage reports, ensuring high-quality and reliable software delivery.

Advanced application engineer

Accenture

(October 2025 – Present)

- **Description:**
- Developed and integrated a **Retrieval-Augmented Generation (RAG)** pipeline using LLMs.
- Built full-stack applications with React and Flask (backend), leveraging **AWS Lex** for chatbot functionality.
- Designed RESTful APIs and data workflow by applying **prompt engineering** to enhance model responses.
- Deployed solutions on **Azure** Web Apps and Functions Apps, ensuring scalability and high availability.
- Integrated **Bright Data API** for large-scale data collection and processing, enabling richer analytics.
- Utilized **Google BigQuery** for efficient querying of large datasets, reducing analysis time significantly.
- Created an interactive analytics dashboard in **Looker Studio**, providing real-time insights and visualizations for stakeholders.

SKILLS

- **Programming Languages:** C, C++, Python, Java, JavaScript
- **Web Development:** HTML, CSS, JavaScript, Bootstrap, React.js, Next.js, MaterialUI, Node.js, Express.js, Python Flask,
- REST API Design, Authentication and Authorization, JWT, SSO
- **Databases:** MongoDB, MySQL
- **AI / Data & Backend Technologies:** Retrieval-Augmented Generation (RAG), Large Language Models (LLMs), Prompt Engineering, API Integration, Data Processing (PDF/Document Parsing), BrightData, Big query, SQL
- **Computer Science Subjects:** Data Structure and Algorithms, Object Oriented Programming, Database Management System, Operating Systems, Computer Networks,
- **DevOps and cloud tools:** AWS, Kubernetes, CI/CD pipeline, Docker, AWS cloud fundamentals, YAML Configuration files
- **Utilities and Tools:** Gitlab, Github, Git, Postman

PROJECTS

Chicago Crime Data analysis dashboard using Python Flask

- **Link:** <https://github.com/Palak28-web/chicago>
- **Description:** This project is a web-based Chicago Crime Data Analytics Dashboard built using **Python, Flask, Pandas, MySQL, and data visualization libraries**. It implements a complete data ingestion pipeline, starting from CSV ingestion and cleaning to structured storage in **MySQL**.
- Built a complete data ingestion pipeline from CSV to MySQL, enabling structured storage and faster querying.

POSITION OF RESPONSIBILITY

- Organized Chemical Department Day 2024, coordinating 200+ participants and managing logistics.
- Executive in décor team of Chemical department day 2022 and 2023.
- Member of Computer Science Club, Creative arts club and mess committee.
